01 PROFILE

with 4 year+ experience in web development and 2 year+ in ruby on rails development. I confident with my skill to create and maintain any website with ruby on rails, include react-js and vue-js is frontend.

02 EMPLOYMENT HISTORY

2013 — 2015

Ha Noi

installation of fire pipes

installation of fire pipes in some building, This is time before I go to learn in PTIT academy.

May 2017 — Nov 2018

Ha Noi

Freelance at web developer

This time I coding template website for my brother, I was try some project wordpress, php. I also try to promote my skill in frontend too.

Jan 2019 — Aug 2019

Ha Noi

Intern at web developer at Sun*

I learned and try to promote my skill with ruby on rails. I really like this time because I was learned many thing about backend and created full project with frontend and backend. In this time, I try to create a restaurant project and it is my first project.

Sep 2019 — Mar 2020

Ha Noi

Fresher at web developer at Rikkeisoft

I was joined 4 project in this time, all of them are ruby on rails.

I was tried working with docker, creating, maintain some project with docker.

I was tried deploying some project with capistrano, nginx, apache2 and ec2. I got a teacher and learned more skill about deployment.

Jun 2020 — May 2021

Ha Noi

Junior at web developer at Sotatek

I join Sotatek with junior ruby on rails developer position. In Sotatek, I only one project ruby on rails and it promote my skill too much. I was tried to:

- Create database, of course I was not a key in this task, but I read and tried to understand the table was created by my leader. I really want to join a job with position create database. I confident that I can do it.
- Development a part of website. tried use design pattern in higher level,
- I need optimize query and website. As you know about N+1 query and create index of database. It seem to be easy but sometime it raise big error or slowly loading data. Example, when you have many index in a query, and mysql dont know what is correct index will be used in that query, that time you need to check what index give you best performance and force mysql use it. And some time is case about retina, or loading js, css...

03 EDUCATION
